

INSULATING GOOD NEWS LODGE

The ARC wants to install new 6 foot Air Chutes, Block plate under air chute with fiber glass and install R40 Blown Cellulose in the attic Area to bring it to R50.

This upgrade will prevent ice dams from reoccurring and ruining the building. It will also cut the cost of electricity and heating bills.

The cost for doing this job including labor and materials is \$9512.00

We thank you for prayerfully considering this proposal and partnering with our ministry.

(left and below) Currently has non-breathable soffit 2nd floor and no air chutes in attic space

(left) Attic space after air chute installation.
