

Workshop Videos

After hosting our Disciple Equipping Workshops at their churches, some district pastors shared that while they liked the in-person workshop, they also recognized that it can be hard to schedule and promote in-person events. They suggested that congregations could also benefit from working through the workshop material at their own pace and review it more than once.

These observations led the Evangelism & Discipleship Board to plan a new project: 30-minute video segments that cover the same content as our in-person workshops. Though we'll continue to offer in-person workshops, these video workshops will allow greater access to our workshop content and enable congregations to view them at the times that work best for them.

The quote we have for recording and editing 6, 30-minute videos for each workshop is approximately \$5000.
